SCIENCE, SOUND & SUSTAINABILITY

"Serious musicians... who find melody in their trash."

- *New York Times*

FOR 30 YEARS BASH THE TRASH HAS BEEN BUILDING, PERFORMING AND EDUCATING WITH MUSICAL INSTRUMENTS MADE FROM RECYCLED AND REUSED MATERIALS, WEAVING TOGETHER SCIENCE, MUSIC AND ENVIRONMENTAL AWARENESS. WE DEMONSTRATE HOW SCIENCE CAN TRANSFORM EVEN THE SIMPLEST STUFF INTO COOL-SOUNDING INSTRUMENTS, AND SHOW STUDENTS HOW TO MAKE THEIR OWN!

PERFORMANCES & ASSEMBLIES

WORKSHOPS & RESIDENCIES

SUMMER CAMPS

FAMILY EVENTS

PROFESSIONAL DEVELOPMENT

Any of our Standalone Shows are available at any time. Or for a deeper experience explore The Sustainable Series: 5 sequential shows that incrementally builds your students' knowledge of science, arts and the environment for as many as 5 years.

SUSTAINABLE SOUNDS

STAND-ALONE

YEAR 1

Your school's entry point into a world of science, music and the environment! Fast, funny and full of crazy instruments made from recycled and reused stuff, cool science demos, and fun music, this show is an invitation to explore the connections between arts and science!

FOUND SOUND SCIENCE

YEAR 2

STEM, STEAM and sustainability! This follow-up performance is packed with trash-instrument content that goes deeper into sound, science and the environment. All-new music, demonstrations and instruments show how science can transform simple materials into amazing music-makers.

TRASH JAM

YEAR 3

Everything your students need to start their own Trash Band! In the third performance of the series we transform students into sound waves; demonstrate how to make eco-music with classmates, friends and family; and finish with an onstage jam session in which everyone gets involved.

GLOBAL BASH

YEAR 4 or 5

What do homemade instruments look like around the world? Global Bash brings to your school amazing performers who use simple and homemade instruments to create incredible live music. A great introduction to global cultures through music!

TRASH TO TECHNO

YEAR 4 or 5

High tech meets low tech as found objects are transformed by technology into danceable beats. Issues of sustainability and plastic pollution as well as acoustics and music production are explored through fun demos, student participation, and cool science. An unforgettable STEAM presentation!

Contact us to discuss hands-on follow-up workshops as well as longer STEAM-based residencies with our highly experienced teaching artists.
